### **DETAILED ACTION**

This application is in condition for allowance except for the following formal matters:

#### **In the Specification:**

The disclosure is objected to because of the following informalities: Page 5, line 13, note that "4A-B" should be rewritten as --4A-4B--. Page 7, lines 1 & 2, note that the specification's reference to "figure 3" (l. 1) and "figure 1" (l. 2) does not appear consistent with the corresponding "figure 5" labeling where the solid line is reference with respect to "Fig. 4" (and not Figure 3 as per the specification) and the dashed line is reference with respect to "fig. 2" (and not Figure 1 as per the specification). Appropriate correction is required.

The disclosure is objected to because of the following informalities: In the specification descriptions of Figs. 1, 2, 6, 7A, 7B, 7C, 7D, 7E, 7F, 7G, 7H, 7J, 7K, 8A, 8B, note that further elaboration as to the specific nature of equivalent circuit schematics, as well as the particular physical structure (including any reference labels associated therewith) should be provided herewith for the indicated drawing figures. Appropriate correction is required.

#### **In the Drawings:**

The drawings are objected to because it is again requested that in Fig. 4B, reference labels (1, 2, 3, 4) be added to the drawing figure such as to be consistent with the labeling provided at page 6, third full paragraph of the specification. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

**In the Claims:**

In claim 1, line 10, note that "remaining two" should be rephrased as --remaining holes-- for a proper characterization; line 13, note that "said each" should be rephrased as --each of said-- for a proper characterization; lines 27, 28, note that "said offset hole has a pattern of conductive material surrounding said hole" should be deleted since this recitation is redundant given that "each hole" already has been defined by a surrounding conductive material; line 33, note that --a-- should precede "capacitance" & --is provided-- should follow "C1"; lines 34, 35, note that "where C1 is the ... of conductive material" should be deleted in its entirety as being unnecessary; line 40, note that "is provided" should follow "pattern" for clarity.

In claim 4, note that "hole's center is" should be rephrased as --hole has a center which is-- for clarity.

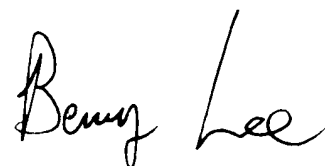

In claim 13, line 2, note that "is after a " should be rephrased for a better characterization

In claim 14, note that --non-offset-- should follow "three" for a proper characterization.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
